Proficiency

● PROFESSIONAL SUMMARY

Software Engineering student and full-stack developer focused on building modern, reliable web applications and management systems. Experienced across frontend development, REST APIs, authentication, relational data modelling and database-driven workflows using React, Next.js, TypeScript, Node.js, PostgreSQL and Prisma. I value clean code, maintainability, security and practical software delivery.

■ PROFESSIONAL EXPERIENCE

Full-Stack Developer - Independent & Project Development

Mogadishu, Somalia 2025 - Present

- Designed and delivered 4+ full-stack management systems for academic, personal and practical workflow scenarios.
- Built REST APIs, secure authentication, role-based access control, CRUD workflows and multi-user features.
- Designed relational and document data models using PostgreSQL, MongoDB and Prisma ORM.
- Created responsive React/Next.js interfaces with TypeScript and Tailwind CSS, with attention to usability and maintainability.
- Used Git/GitHub, testing, debugging and Docker fundamentals to improve development and delivery workflows.

★ SELECTED PROJECTS

Multi-Branch Real Estate Rental Management System

Next.js • TypeScript • NestJS • PostgreSQL • Prisma • Redis

Multi-branch rental and property management platform covering company branches, owners, properties, rentable spaces, leasing, authorization, operational workflows and finance-ready architecture.

Clinic Management System

React • Node.js • PostgreSQL • Prisma

Role-based healthcare workflow system for reception, doctors, laboratory staff, pharmacy and administration, including patient registration, consultation, lab requests, payments and results.

Pharmacy Management System

MongoDB • Express.js • React.js • Node.js

Management application with authentication, admin dashboard, product and customer management, sales and orders, inventory tracking, discount handling and revenue reporting.

MOHAMED AHMED MAHMOUD

GENERAL PROFESSIONAL RESUME • github.com/mohamedkulane • mohankulane@gmail.com

◦ **CORE STRENGTHS** ◦

Responsive Web Apps
REST API Development
Authentication & RBAC
Database Design
CRUD Workflows
System Design Fundamentals
Testing & Debugging
Version Control
Docker Fundamentals

◦ **SOFT SKILLS** ◦

Problem Solving
Communication
Teamwork
Critical Thinking
Time Management
Adaptability
Continuous Learning

◦ **CAREER INTERESTS** ◦

Software Engineering
Full-Stack Development
Backend Engineering
System Architecture
AI Agents & Automation

● **ADDITIONAL PROJECTS**

School Enrollment & Reporting Platform

React • Responsive UI • Data Validation • Reporting

Enrollment and administrative reporting workflow with structured student records, class-level counts, gender summaries and dashboard metrics for school operations.

Student Performance Calculator

Python • Validation • Calculations • Formatted Reports

Command-line project that calculates total marks, percentage, average, highest and lowest scores, score differences and target marks while producing a structured performance report.

● **EDUCATION**

Bachelor of Software Engineering

Hormuud University 2024 - Expected 2028

- Building foundations in programming, databases, data structures & algorithms, software design and applied software development.

Secondary School

Jaabir Bin Hayan Primary & Secondary School Completed 2024

★ **CERTIFICATION & CONTINUOUS LEARNING**

Full Stack Web Development

Rise Academy 2025

- Continuously developing software engineering fundamentals, full-stack architecture, deployment practices and AI/agent development knowledge.

● **PROFESSIONAL PROFILE**

I am interested in software engineering, full-stack and backend development opportunities where I can contribute to real products, collaborate with experienced teams and continue growing through hands-on engineering work. I am also open to internships, junior roles, remote opportunities and project-based work.

★ **WHAT I BRING**

- End-to-end web application development across UI, API and database layers.
- Practical experience translating business workflows into structured software features.
- Strong learning mindset with attention to code quality, maintainability and security.
- Clear communication, responsibility and willingness to collaborate and improve.
